Subject Index to Volume 24

Accelerated constant stiffness iteration

- Efficient and reliable solutions of static and dynamic nonlinear structural mechanics problems by an integrated numerical approach using DQFEM and direct time integration with accelerated equilibrium iteration schemes, C.N. Chen 24 (2000) 637

Accuracy estimates

- Modelling dynamics of piezoelectric solids in the two-dimensional case, R.V.N. Melnik and K.N. Melnik 24 (2000) 147

Adaptive control

- Modelling and control of two robotic manipulators handling a constrained object, M. Zribi, M. Karkoub and L. Huang 24 (2000) 881

Adsorption

- Dynamic model for predicting dust-borne odour concentrations in ventilated animal housing, C.-M. Liao, J.-S. Chen and J.-W. Chen 24 (2000) 131

Advection schemes

- A high-performance explicit vertical advection scheme for ocean models: how PPM can beat the CFL condition, I.D. James 24 (2000) 1

Airborne dust

- Dynamic model for predicting dust-borne odour concentrations in ventilated animal housing, C.-M. Liao, J.-S. Chen and J.-W. Chen 24 (2000) 131

Analytical solutions

- Magnetic saturation and steady-state analysis of electrical motors, F.M. Atay 24 (2000) 827

Aquaculture

- An optimal trace zinc biomonitor (*Haliotis diversicolor supertexta*) control system design in aquacultural ecosystems, C.-M. Liao, B.-C. Chen, M.-C. Lin and J.-W. Chen 24 (2000) 27

Asymptotic solutions

- Asymptotic solutions for mode II dynamic rupture with nonlinear damping, Fan Jiashen and Fan Lei 24 (2000) 407

Availability

- Cost and probabilistic analysis of series systems with mixed standby components, K.H. Wang and C.C. Kuo 24 (2000) 957

Averaging techniques

- On the relation between the methods of averaging and normal forms, W. Zhang and K. Huseyin 24 (2000) 279

Bank courier

- Current modeling practices in bank courier scheduling, C.J. Malmberg 24 (2000) 315

Bifurcation

- Chaos in a three dimensional neural network, A. Das, A.B. Roy and P. Das 24 (2000) 511

Bioaccumulation

- An optimal trace zinc biomonitor (*Haliotis diversicolor supertexta*) control system design in aquacultural ecosystems, C.-M. Liao, B.-C. Chen, M.-C. Lin and J.-W. Chen 24 (2000) 27

Biomass energy

- A CFD based combustion model of an entrained flow biomass gasifier, D.F.

- Fletcher, B.S. Haynes, F.C. Christo and S.D. Joseph 24 (2000) 165
- Biomonitor*
- An optimal trace zinc biomonitor (*Haliotis diversicolor supertexta*) control system design in aquacultural ecosystems, C.-M. Liao, B.-C. Chen, M.-C. Lin and J.-W. Chen 24 (2000) 27
- Blade element*
- A hybrid method for simulation of axial flow impeller driven mixing vessels, H.M. Blackburn, J.R. Elston, D.A. Niclasen, M. Rudman and J. Wu 24 (2000) 795
- Boundary finite element*
- An integral method to compute guided modes of an optical coupler in the vectorial case, C. Bekkey and R. Djellouli 24 (2000) 697
- Boundary-layers*
- Modelling a bottom diurnal boundary layer and its control of massive alga blooms in an estuary, C.J. Hearn and B.J. Robson 24 (2000) 843
- Boussinesq equations*
- Numerical modelling of multi-directional irregular waves through breakwaters, Y.S. Li, S.-X. Liu, Y.-X. Yu and G.-Z. Lai 24 (2000) 551
- Breakwaters*
- Numerical modelling of multi-directional irregular waves through breakwaters, Y.S. Li, S.-X. Liu, Y.-X. Yu and G.-Z. Lai 24 (2000) 551
- Bubbles*
- A simple computational model for bubble plumes, R.S. Bernard, R.S. Maier and H.T. Falvey 24 (2000) 215
- Bubble plumes*
- A simple computational model for bubble plumes, R.S. Bernard, R.S. Maier and H.T. Falvey 24 (2000) 215
- Buoyancy driven flow*
- Computation of the turbulent plane plume using the $k-\epsilon-\bar{r}^2-\gamma$ model, K. Kalita, A. Dewan and A.K. Dass 24 (2000) 815
- Capacity management*
- Some quantitative methods for determining capacities and locations of military emergency medical facilities, R.S. Segall 24 (2000) 365
- Cartesian grids*
- A Cartesian cut cell method for incompressible viscous flow, P.G. Tucker and Z. Pan 24 (2000) 591
- Cavity wall impact*
- Studies on the dynamics of a supercavitating projectile, S.S. Kulkarni and R. Pratap 24 (2000) 113
- CFD*
- Using a multi-parameter particle shape description to predict the motion of non-spherical particle shapes in swirling flow, L. Rosendahl 24 (2000) 11
- Computational analysis of thermal comfort: the case of the archaeological museum of Athens, K.A. Papakonstantinou, C.T. Kiranoudis and N.C. Markatos 24 (2000) 477
- Simulation of the ignition of lean methane mixtures using CFD modelling and a reduced chemistry mechanism, M. Jazbec, D.F. Fletcher and B.S. Haynes 24 (2000) 689
- CFD modelling*
- A CFD based combustion model of an entrained flow biomass gasifier, D.F. Fletcher, B.S. Haynes, F.C. Christo and S.D. Joseph 24 (2000) 165
- Chaos*
- Chaos in a three dimensional neural network, A. Das, A.B. Roy and P. Das 24 (2000) 511
- Combustion*
- A CFD based combustion model of an entrained flow biomass gasifier, D.F. Fletcher, B.S. Haynes, F.C. Christo and S.D. Joseph 24 (2000) 165
- Computational fluid dynamics*
- Analysis of three-dimensional flow in a cylindrical sediment oxygen demand chamber, J.H.W. Lee, C.P. Kuang and K.S. Yung 24 (2000) 263

Conformal mapping

Design of hydraulic structures with two intermediate filters, M.I. Farouk and I.M. Smith

24 (2000) 779

Connection degree

Modeling microgeometric structures of porous media with a predominant axis for predicting diffusive flow in capillaries, X. Zeng, C. Vasseur and F. Fayala

24 (2000) 969

Constrained multiple robots

Modelling and control of two robotic manipulators handling a constrained object, M. Zribi, M. Karkoub and L. Huang

24 (2000) 881

Contact pressure

Ring plate on a transversely isotropic elastic halfspace, S.J. Antony and K. Chandrashekhara

24 (2000) 55

Control

The regulation of mechanical drive systems, R. Whalley and M. Ebrahimi

24 (2000) 247

Chaos in a three dimensional neural network, A. Das, A.B. Roy and P. Das

24 (2000) 511

A recursive method to the optimal control of an M/G/1 queueing system with finite capacity and infinite capacity, K.H. Wang and J.C. Ke

24 (2000) 899

Corner points

Modelling dynamics of piezoelectric solids in the two-dimensional case, R.V.N. Melnik and K.N. Melnik

24 (2000) 147

Corrugation angle

Hydrodynamics and thermal characteristics of corrugated channels: computational approach, M.A. Mehrabian and R. Poulter

24 (2000) 343

Cost

A queueing system with queue-dependent servers and finite capacity, K.H. Wang and K.Y. Tai

24 (2000) 807

A recursive method to the optimal control of an M/G/1 queueing system with finite capacity and infinite capacity, K.H. Wang and J.C. Ke

24 (2000) 899

Cost-benefit

Cost and probabilistic analysis of series systems with mixed standby components, K.H. Wang and C.C. Kuo

24 (2000) 957

Coupled chemistry-hydrodynamics

Simulation of the ignition of lean methane mixtures using CFD modelling and a reduced chemistry mechanism, M. Jazbec, D.F. Fletcher and B.S. Haynes

24 (2000) 689

Courant number

A high-performance explicit vertical advection scheme for ocean models: how PPM can beat the CFL condition, I.D. James

24 (2000) 1

Cross-sections

Modeling microgeometric structures of porous media with a predominant axis for predicting diffusive flow in capillaries, X. Zeng, C. Vasseur and F. Fayala

24 (2000) 969

Curve sawing

Mathematical modeling of curve sawing techniques for lumber industry, F. Hébert, F. Grondin and J. Plaise

24 (2000) 677

Cut cells

A Cartesian cut cell method for incompressible viscous flow, P.G. Tucker and Z. Pan

24 (2000) 591

Cylindrical chamber flow

Analysis of three-dimensional flow in a cylindrical sediment oxygen demand chamber, J.H.W. Lee, C.P. Kuang and K.S. Yung

24 (2000) 263

Dam break

Numerical solution of the two-dimensional unsteady dam break, C. Zoppou and S. Roberts

24 (2000) 457

Decay rates

The regulation of mechanical drive systems, R. Whalley and M. Ebrahimi

24 (2000) 247

Decentralized control

- Decentralized controllers design for open-channel hydraulic systems via eigen-structure assignment and C. Seatzu 24 (2000) 915

Deflections of machining systems

- Prediction of diameter errors in bar turning: a computationally effective model, J.R.R. Mayer, A.-V. Phan and G. Cloutier 24 (2000) 943

Deposition

- Dynamic model for predicting dust-borne odour concentrations in ventilated animal housing, C.-M. Liao, J.-S. Chen and J.-W. Chen 24 (2000) 131

Deterioration

- An economic lot-size model for deteriorating items with lot-size dependent replenishment cost and time-varying demand, Y.W. Zhou and H.S. Lau 24 (2000) 761

Diffusion stretched flames

- Modelling of stretched natural gas diffusion flames, H.H. Liakos, M.A. Founti and N.C. Markatos 24 (2000) 419

Diffusive flow in capillaries

- Modeling microgeometric structures of porous media with a predominant axis for predicting diffusive flow in capillaries, X. Zeng, C. Vasseur and F. Fayala 24 (2000) 969

Dimensional errors

- Prediction of diameter errors in bar turning: a computationally effective model, J.R.R. Mayer, A.-V. Phan and G. Cloutier 24 (2000) 943

Directional coupler

- An integral method to compute guided modes of an optical coupler in the vectorial case, C. Bekkey and R. Djellouli 24 (2000) 697

Dispersion

- Simulation of homogeneous and incompressible Çınlar flows, M. Çağlar 24 (2000) 297

Displacement profile

- Ring plate on a transversely isotropic elastic halfspace, S.J. Antony and K. Chandrashekhara 24 (2000) 55

Dissolved oxygen

- Analysis of three-dimensional flow in a cylindrical sediment oxygen demand chamber, J.H.W. Lee, C.P. Kuang and K.S. Yung 24 (2000) 263

Downwelling

- A high-performance explicit vertical advection scheme for ocean models: how PPM can beat the CFL condition, I.D. James 24 (2000) 1

DQFEM

- Efficient and reliable solutions of static and dynamic nonlinear structural mechanics problems by an integrated numerical approach using DQFEM and direct time integration with accelerated equilibrium iteration schemes, C.N. Chen 24 (2000) 637

Dust-borne odour

- Dynamic model for predicting dust-borne odour concentrations in ventilated animal housing, C.-M. Liao, J.-S. Chen and J.-W. Chen 24 (2000) 131

Dynamic stiffness matrix

- A simple soilstructure interaction model, S. Kocak and Y. Mengi 24 (2000) 607

Eddy current problem

- Stochastic finite element analysis of two-dimensional eddy current problems, A. Szulalec 24 (2000) 401

Eigenstructure assignment

- Decentralized controllers design for open-channel hydraulic systems via eigen-structure assignment, C. Seatzu 24 (2000) 915

Electromagnetic field

- Stochastic finite element analysis of two-dimensional eddy current problems, A. Szulalec 24 (2000) 401

Electro-mechanical interactions

- Modelling dynamics of piezoelectric solids in the two-dimensional case, R.V.N. Melnik and K.N. Melnik 24 (2000) 147

ELS model

- An economic lot-size model for deteriorating items with lot-size dependent replenishment cost and time-varying demand, Y.W. Zhou and H.S. Lau 24 (2000) 761

Engineering design optimization

- An evolutionary programming approach to mixed-variable optimization problems, Y.J. Cao, L. Jiang and Q.H. Wu 24 (2000) 931

Enthalpy method

- Spherical solidification by the enthalpy method and the heat balance integral method, J. Caldwell and C.-C. Chan 24 (2000) 45

Entrainment

- Computation of the turbulent plane plume using the $k-\epsilon-\overline{v^2}-\gamma$ model, K. Kalita, A. Dewan and A.K. Dass 24 (2000) 815

Environmental hydraulics

- Analysis of three-dimensional flow in a cylindrical sediment oxygen demand chamber, J.H.W. Lee, C.P. Kuang and K.S. Yung 24 (2000) 263

Estuaries

- Modelling a bottom diurnal boundary layer and its control of massive alga blooms in an estuary, C.J. Hearn and B.J. Robson 24 (2000) 843

Evolutionary programming

- An evolutionary programming approach to mixed-variable optimization problems, Y.J. Cao, L. Jiang and Q.H. Wu 24 (2000) 931

Explicit

- An explicit scheme for tracking the filling front during polymer mold filling, J.A. Luoma and V.R. Voller 24 (2000) 575

Explicit predictor-corrector iteration

- Efficient and reliable solutions of static and dynamic nonlinear structural mechanics problems by an integrated numerical approach using DQFEM and direct time integration with accelerated equilibrium iteration schemes, C.N. Chen 24 (2000) 637

Facility location

- Some quantitative methods for determining capacities and locations of military emergency medical facilities, R.S. Segall 24 (2000) 365

Filmwise condensation

- An inverse problem approach for estimating the wall heat flux in filmwise condensation on a vertical surface with variable heat flux and body force convection, P.-T. Hsu, S.-G. Wang and T.-Y. Li 24 (2000) 235

Finite element

- Stochastic finite element analysis of two-dimensional eddy current problems, A. Szulc 24 (2000) 401
- Comparison of finite element and finite volume methods application in geometrically nonlinear stress analysis, N.A. Fallah, C. Bailey, M. Cross and G.A. Taylor 24 (2000) 439

Finite element model

- Prediction of diameter errors in bar turning: a computationally effective model, J.R.R. Mayer, A.-V. Phan and G. Cloutier 24 (2000) 943

Finite volume

- Comparison of finite element and finite volume methods application in geometrically nonlinear stress analysis, N.A. Fallah, C. Bailey, M. Cross and G.A. Taylor 24 (2000) 439

Finite volume method

- Analysis of three-dimensional flow in a cylindrical sediment oxygen demand chamber, J.H.W. Lee, C.P. Kuang and K.S. Yung 24 (2000) 263

Flow planes

- Studies on the dynamics of a supercavitating projectile, S.S. Kulkarni and R. Pratap 24 (2000) 113

Footing-footing interaction

- A simple soilstructure interaction model, S. Kocak and Y. Mengi 24 (2000) 607

Free surface

- An explicit scheme for tracking the filling front during polymer mold filling, J.A. Luoma and V.R. Voller 24 (2000) 575

Freezing point of seawater

- Penetrative convection in a horizontal layer of seawater near its freezing point, L. Hadji and M.A.R. Sharif 24 (2000) 733

Frequency

- The regulation of mechanical drive systems, R. Whalley and M. Ebrahimi 24 (2000) 247
A simple soilstructure interaction model, S. Kocak and Y. Mengi 24 (2000) 607

Fuzzy theory

- Modeling microgeometric structures of porous media with a predominant axis for predicting diffusive flow in capillaries, X. Zeng, C. Vasseur and F. Fayala 24 (2000) 969

Galerkin method

- Resolution by Galerkin method with a special basis of a geophysical flow in open sea: a Calvi's bay simulation, F. Bosseur, B. Di Martino and P. Orenge 24 (2000) 73

Gas-particle flow

- Using a multi-parameter particle shape description to predict the motion of non-spherical particle shapes in swirling flow, L. Rosendahl 24 (2000) 11

Gasification

- A CFD based combustion model of an entrained flow biomass gasifier, D.F. Fletcher, B.S. Haynes, F.C. Christo and S.D. Joseph 24 (2000) 165

Gasifier

- A CFD based combustion model of an entrained flow biomass gasifier, D.F. Fletcher, B.S. Haynes, F.C. Christo and S.D. Joseph 24 (2000) 165

Geometrically nonlinear

- Comparison of finite element and finite volume methods application in geometrically nonlinear stress analysis, N.A. Fallah, C. Bailey, M. Cross and G.A. Taylor 24 (2000) 439

Geophysical flow

- Resolution by Galerkin method with a special basis of a geophysical flow in open sea: a Calvi's bay simulation, F. Bosseur, B. Di Martino and P. Orenge 24 (2000) 73

Global optimization

- An evolutionary programming approach to mixed-variable optimization problems, Y.J. Cao, L. Jiang and Q.H. Wu 24 (2000) 931

Global secant relaxation

- Efficient and reliable solutions of static and dynamic nonlinear structural mechanics problems by an integrated numerical approach using DQFEM and direct time integration with accelerated equilibrium iteration schemes, C.N. Chen 24 (2000) 637

Guided modes

- An integral method to compute guided modes of an optical coupler in the vectorial case, C. Bekkey and R. Djellouli 24 (2000) 697

Heat balance integral method

- Spherical solidification by the enthalpy method and the heat balance integral method, J. Caldwell and C.-C. Chan 24 (2000) 45

Heat flux

- An inverse problem approach for estimating the wall heat flux in filmwise condensation on a vertical surface with variable heat flux and body force convection, P.-T. Hsu, S.-G. Wang and T.-Y. Li 24 (2000) 235

Heterogeneous

- A queueing system with queue-dependent servers and finite capacity, K.H. Wang and K.Y. Tai 24 (2000) 807

Heuristic search

- Current modeling practices in bank courier scheduling, C.J. Malmborg 24 (2000) 315

High concentration

- A computer code for simulating hyper-concentrated sediment motions in steady and unsteady flows, K. Zhang and P. Dong 24 (2000) 495

Hollow piezoceramic cylinders

- Modelling dynamics of piezoelectric solids in the two-dimensional case, R.V.N. Melnik and K.N. Melnik 24 (2000) 147

Homotopy

- A note on the solution to a common thermal network problem encountered in heat-transfer analysis of spacecraft, M. Milman and W. Petrick 24 (2000) 861

Hydraulic structures

- Design of hydraulic structures with two intermediate filters, M.I. Farouk and I.M. Smith 24 (2000) 779

Ignition

- Simulation of the ignition of lean methane mixtures using CFD modelling and a reduced chemistry mechanism, M. Jazbec, D.F. Fletcher and B.S. Haynes 24 (2000) 689

Impact dynamics

- Studies on the dynamics of a supercavitating projectile, S.S. Kulkarni and R. Pratap 24 (2000) 113

Impeller

- A hybrid method for simulation of axial flow impeller driven mixing vessels, H.M. Blackburn, J.R. Elston, D.A. Niclasen, M. Rudman and J. Wu 24 (2000) 795

Implicit

- An explicit scheme for tracking the filling front during polymer mold filling, J.A. Luoma and V.R. Voller 24 (2000) 575

Information technology

- Current modeling practices in bank courier scheduling, C.J. Malmborg 24 (2000) 315

Integral method

- An integral method to compute guided modes of an optical coupler in the vectorial case, C. Bekkey and R. Djellouli 24 (2000) 697

Interleaving

- An integrated performance model for order-picking systems with randomized storage, C.J. Malmborg and K. Al-Tassan 24 (2000) 95

Intermediate filters

- Design of hydraulic structures with two intermediate filters, M.I. Farouk and I.M. Smith 24 (2000) 779

Intermittency

- Computation of the turbulent plane plume using the $k-\epsilon-\bar{r}^2-\gamma$ model, K. Kalita, A. Dewan and A.K. Dass 24 (2000) 815

Interpolation

- A Cartesian cut cell method for incompressible viscous flow, P.G. Tucker and Z. Pan 24 (2000) 591

Inventory

- Optimization of maintenance and spare provisioning policy using simulation, R. Sarker and A. Haque 24 (2000) 751

Inverse model

- An inverse problem approach for estimating the wall heat flux in filmwise condensation on a vertical surface with variable heat flux and body force convection, P.-T. Hsu, S.-G. Wang and T.-Y. Li 24 (2000) 235

Ladles

- A simple computational model for bubble plumes, R.S. Bernard, R.S. Maier and H.T. Falvey 24 (2000) 215

Laminar flows

- A Cartesian cut cell method for incompressible viscous flow, P.G. Tucker and Z. Pan 24 (2000) 591

Laminar swirling flow

- Analysis of three-dimensional flow in a cylindrical sediment oxygen demand chamber, J.H.W. Lee, C.P. Kuang and K.S. Yung 24 (2000) 263

Layered soil medium

- A simple soilstructure interaction model, S. Kocak and Y. Mengi 24 (2000) 607

Lean combustion

- Simulation of the ignition of lean methane mixtures using CFD modelling and a reduced chemistry mechanism, M. Jazbec, D.F. Fletcher and B.S. Haynes 24 (2000) 689

Less than unit load

- An integrated performance model for order-picking systems with randomized storage, C.J. Malmberg and K. Al-Tassan 24 (2000) 95

Lyapunov exponent

- Chaos in a three dimensional neural network, A. Das, A.B. Roy and P. Das 24 (2000) 511

M/G/1 queue

- A recursive method to the optimal control of an M/G/1 queueing system with finite capacity and infinite capacity, K.H. Wang and J.C. Ke 24 (2000) 899

Maintenance

- Optimization of maintenance and spare provisioning policy using simulation, R. Sarker and A. Haque 24 (2000) 751

Mathematical modelling

- Mathematical modeling of curve sawing techniques for lumber industry, F. Hébert, F. Grondin and J. Plaipe 24 (2000) 677
- Modeling microgeometric structures of porous media with a predominant axis for predicting diffusive flow in capillaries, X. Zeng, C. Vasseur and F. Fayala 24 (2000) 969
- Magnetic saturation and steady-state analysis of electrical motors, F.M. Atay 24 (2000) 827
- Modelling and control of two robotic manipulators handling a constrained object, M. Zribi, M. Karkoub and L. Huang 24 (2000) 881

Mathematical programming

- Some quantitative methods for determining capacities and locations of military emergency medical facilities, R.S. Segall 24 (2000) 365

Matrix impedance models

- The regulation of mechanical drive systems, R. Whalley and M. Ebrahimi 24 (2000) 247

Maxwell system

- An integral method to compute guided modes of an optical coupler in the vectorial case, C. Bekkey and R. Djellouli 24 (2000) 697

Mechanism reduction

- Simulation of the ignition of lean methane mixtures using CFD modelling and a reduced chemistry mechanism, M. Jazbec, D.F. Fletcher and B.S. Haynes 24 (2000) 689

Microgeometric structure

- Modeling microgeometric structures of porous media with a predominant axis for predicting diffusive flow in capillaries, X. Zeng, C. Vasseur and F. Fayala 24 (2000) 969

Microscopic characteristics

- Hydrodynamics and thermal characteristics of corrugated channels: computational approach, M.A. Mehrabian and R. Poulter 24 (2000) 343

Mixed variables

- An evolutionary programming approach to mixed-variable optimization problems, Y.J. Cao, L. Jiang and Q.H. Wu 24 (2000) 931

Mixing

- A simple computational model for bubble plumes, R.S. Bernard, R.S. Maier and H.T. Falvey 24 (2000) 215
- A hybrid method for simulation of axial flow impeller driven mixing vessels, H.M. Blackburn, J.R. Elston, D.A. Niclasen, M. Rudman and J. Wu 24 (2000) 795

Mode II dynamic rupture

- Asymptotic solutions for mode II dynamic rupture with nonlinear damping, Fan Jiashen and Fan Lei 24 (2000) 407

Models

- A simple computational model for bubble plumes, R.S. Bernard, R.S. Maier and H.T. Falvey 24 (2000) 215

Molding

- An explicit scheme for tracking the filling front during polymer mold filling, J.A. Luoma and V.R. Voller 24 (2000) 575

Mollusc

- An optimal trace zinc biomonitor (*Haliotis diversicolor supertexta*) control system design in aquacultural ecosystems, C.-M. Liao, B.-C. Chen, M.-C. Lin and J.-W. Chen 24 (2000) 27

Monte Carlo simulation

- Particle sieving in a random fiber network, J. Castro and M. Ostoj-Starzewski 24 (2000) 523
A random-walk pseudorandom byte generator, D.A. Dahl, C.L. Atwood and R.A. LaViolette 24 (2000) 771

Multi-directional irregular waves

- Numerical modelling of multi-directional irregular waves through breakwaters, Y.S. Li, S.-X. Liu, Y.-X. Yu and G.-Z. Lai 24 (2000) 551

Multilayered anisotropic halfspace

- Ring plate on a transversely isotropic elastic halfspace, S.J. Antony and K. Chandrasekhara 24 (2000) 55

Multi-parameter shape function

- Using a multi-parameter particle shape description to predict the motion of non-spherical particle shapes in swirling flow, L. Rosendahl 24 (2000) 11

Natural ventilation

- Computational analysis of thermal comfort: the case of the archaeological museum of Athens, K.A. Papakonstantinou, C.T. Kiranoudis and N.C. Markatos 24 (2000) 477

Nonlinear damping

- Asymptotic solutions for mode II dynamic rupture with nonlinear damping, Fan Jiashen and Fan Lei 24 (2000) 407

Nonlinear equation of state

- Penetrative convection in a horizontal layer of seawater near its freezing point, L. Hadji and M.A.R. Sharif 24 (2000) 733

Nonlinear systems

- On the relation between the methods of averaging and normal forms, W. Zhang and K. Huseyin 24 (2000) 279

Non-spherical particles

- Using a multi-parameter particle shape description to predict the motion of non-spherical particle shapes in swirling flow, L. Rosendahl 24 (2000) 11

Normal forms

- On the relation between the methods of averaging and normal forms, W. Zhang and K. Huseyin 24 (2000) 279

Numerical stimulation

- A computer code for simulating hyper-concentrated sediment motions in steady and unsteady flows, K. Zhang and P. Dong 24 (2000) 495

Ocean models

- A high-performance explicit vertical advection scheme for ocean models: how PPM can beat the CFL condition, I.D. James 24 (2000) 1

Odour

- Dynamic model for predicting dust-borne odour concentrations in ventilated animal housing, C.-M. Liao, J.-S. Chen and J.-W. Chen 24 (2000) 131

Open-channel hydraulic systems

- Decentralized controllers design for open-channel hydraulic systems via eigenstructure assignment, C. Seatzu 24 (2000) 915

Optimal feedback control

- An optimal trace zinc biomonitor (*Haliotis diversicolor supertexta*) control system design in aquacultural ecosystems, C.-M. Liao, B.-C. Chen, M.-C. Lin and J.-W. Chen 24 (2000) 27

Optimization

- Modelling of optimal specification regions, M.D. Phillips and B.R. Cho 24 (2000) 327
- A queueing system with queue-dependent servers and finite capacity, K.H. Wang and K.Y. Tai 24 (2000) 807

Optimum

- Optimization of maintenance and spare provisioning policy using simulation, R. Sarker and A. Haque 24 (2000) 751

Orderpicking

- An integrated performance model for order-picking systems with randomized storage, C.J. Malmborg and K. Al-Tassan 24 (2000) 95

Parallel implementation

- Efficient and reliable solutions of static and dynamic nonlinear structural mechanics problems by an integrated numerical approach using DQFEM and direct time integration with accelerated equilibrium iteration schemes, C.N. Chen 24 (2000) 637

Parametric model

- A simple soilstructure interaction model, S. Kocak and Y. Mengi 24 (2000) 607

Penetrative convection

- Penetrative convection in a horizontal layer of seawater near its freezing point, L. Hadji and M.A.R. Sharif 24 (2000) 733

Percolation

- Particle sieving in a random fiber network, J. Castro and M. Ostoj-Starzewski 24 (2000) 523

Periodic cell

- Hydrodynamics and thermal characteristics of corrugated channels: computational approach, M.A. Mehrabian and R. Poulter 24 (2000) 343

Periodicity

- Hydrodynamics and thermal characteristics of corrugated channels: computational approach, M.A. Mehrabian and R. Poulter 24 (2000) 343

Phytoplankton

- Modelling a bottom diurnal boundary layer and its control of massive alga blooms in an estuary, C.J. Hearn and B.J. Robson 24 (2000) 843

Plate heat exchangers

- Hydrodynamics and thermal characteristics of corrugated channels: computational approach, M.A. Mehrabian and R. Poulter 24 (2000) 343

Poisson line field

- Particle sieving in a random fiber network, J. Castro and M. Ostoj-Starzewski 24 (2000) 523

Poisson shot-noise

- Simulation of homogeneous and incompressible Çinlar flows, M. Çağlar 24 (2000) 297

Polymer

- An explicit scheme for tracking the filling front during polymer mold filling, J.A. Luoma and V.R. Voller 24 (2000) 575

Porous media

- Modeling microgeometric structures of porous media with a predominant axis for predicting diffusive flow in capillaries, X. Zeng, C. Vasseur and F. Fayala 24 (2000) 969

Predominant axis

- Modeling microgeometric structures of porous media with a predominant axis for predicting diffusive flow in capillaries, X. Zeng, C. Vasseur and F. Fayala 24 (2000) 969

Projectile trajectory

- Studies on the dynamics of a supercavitating projectile, S.S. Kulkarni and R. Pratap 24 (2000) 113

Public buildings

- Computational analysis of thermal comfort: the case of the archaeological museum of Athens, K.A. Papakostantinou, C.T. Kiranoudis and N.C. Markatos 24 (2000) 477

Quality loss function

- Modelling of optimal specification regions,
M.D. Phillips and B.R. Cho 24 (2000) 327

Queue-dependent servers

- A queueing system with queue-dependent
servers and finite capacity, K.H. Wang
and K.Y. Tai 24 (2000) 807

Random fiber network

- Particle sieving in a random fiber network, J.
Castro and M. Ostoj-Starzewski 24 (2000) 523

Random numbers

- A random-walk pseudorandom byte gen-
erator, D.A. Dahl, C.L. Atwood and R.A.
LaViolette 24 (2000) 771

Randomized storage

- An integrated performance model for
orderpicking systems with randomized
storage, C.J. Malmborg and K. Al-Tassan 24 (2000) 95

Reaction rates

- Modelling of stretched natural gas diffusion
flames, H.H. Liakos, M.A. Founti and
N.C. Markatos 24 (2000) 419

Recursive method

- A recursive method to the optimal control of
an M/G/1 queueing system with finite ca-
pacity and infinite capacity, K.H. Wang
and J.C. Ke 24 (2000) 889

Reliability

- Cost and probabilistic analysis of series sys-
tems with mixed standby components,
K.H. Wang and C.C. Kuo 24 (2000) 957

Reservoirs

- A simple computational model for bubble
plumes, R.S. Bernard, R.S. Maier and
H.T. Falvey 24 (2000) 215

Riemann solvers

- Numerical solution of the two-dimensional
unsteady dam break, C. Zoppou and S.
Roberts 24 (2000) 457

Rigid diaphragm

- A simple soilstructure interaction model, S.
Kocak and Y. Mengi 24 (2000) 607

Ring plate

- Ring plate on a transversely isotropic elastic
halfspace, S.J. Antony and K. Chandra-
shekhara 24 (2000) 55

Saturation

- Magnetic saturation and steady-state analysis
of electrical motors, F.M. Atay 24 (2000) 827

Sawmill simulation

- Mathematical modeling of curve sawing
techniques for lumber industry, F. Hébert,
F. Grondin and J. Plaipe 24 (2000) 677

Screening procedures

- Modelling of optimal specification regions,
M.D. Phillips and B.R. Cho 24 (2000) 327

Sediment motions

- A computer code for simulating hyper-con-
centrated sediment motions in steady and
unsteady flows, K. Zhang and P. Dong 24 (2000) 495

Sediment oxygen demand

- Analysis of three-dimensional flow in a cy-
lindrical sediment oxygen demand cham-
ber, J.H.W. Lee, C.P. Kuang and K.S.
Yung 24 (2000) 263

Sequencing and scheduling

- Current modeling practices in bank courier
scheduling, C.J. Malmborg 24 (2000) 315

Series system

- Cost and probabilistic analysis of series sys-
tems with mixed standby components,
K.H. Wang and C.C. Kuo 24 (2000) 957

Service operations

- Some quantitative methods for determining
capacities and locations of military emer-
gency medical facilities, R.S. Segall 24 (2000) 365

Shallow water model

Resolution by Galerkin method with a special basis of a geophysical flow in open sea: a Calvi's bay simulation, F. Bosseur, B. Di Martino and P. Orena

24 (2000) 73

Shallow water waves

Numerical solution of the two-dimensional unsteady dam break, C. Zoppou and S. Roberts

24 (2000) 457

Simulation

Simulation of homogeneous and incompressible Çınlar flows, M. Çağlar

24 (2000) 297

Optimization of maintenance and spare provisioning policy using simulation, R. Sarker and A. Haque

24 (2000) 751

A hybrid method for simulation of axial flow impeller driven mixing vessels, H.M. Blackburn, J.R. Elston, D.A. Niclasen, M. Rudman and J. Wu

24 (2000) 795

Soil-structure interaction

A simple soilstructure interaction model, S. Kocak and Y. Mengi

24 (2000) 607

Spare parts

Optimization of maintenance and spare provisioning policy using simulation, R. Sarker and A. Haque

24 (2000) 751

Spherical solidification

Spherical solidification by the enthalpy method and the heat balance integral method, J. Caldwell and C.-C. Chan

24 (2000) 45

Stability

Studies on the dynamics of a supercavitating projectile, S.S. Kulkarni and R. Pratap

24 (2000) 113

Steady-state solution

A note on the solution to a common thermal network problem encountered in heat-transfer analysis of spacecraft, M. Milman and W. Petrick

24 (2000) 861

Stochastic analysis

Stochastic finite element analysis of two-dimensional eddy current problems, A. Shuzalec

24 (2000) 401

Stochastic flows

Simulation of homogeneous and incompressible Çınlar flows, M. Çağlar

24 (2000) 297

Stochastic simulation

A random-walk pseudorandom byte generator, D.A. Dahl, C.L. Atwood and R.A. LaViolette

24 (2000) 771

Stock management

An integrated performance model for order-picking systems with randomized storage, C.J. Malmborg and K. Al-Tassan

24 (2000) 95

Supercavitating projectile

Studies on the dynamics of a supercavitating projectile, S.S. Kulkarni and R. Pratap

24 (2000) 113

Supercavitation

Studies on the dynamics of a supercavitating projectile, S.S. Kulkarni and R. Pratap

24 (2000) 113

Supplementary variable

A recursive method to the optimal control of an M/G/1 queueing system with finite capacity and infinite capacity, K.H. Wang and J.C. Ke

24 (2000) 889

Swirl flow

A CFD based combustion model of an entrained flow biomass gasifier, D.F. Fletcher, B.S. Haynes, F.C. Christo and S.D. Joseph

24 (2000) 165

Thermal comfort

Computational analysis of thermal comfort: the case of the archaeological museum of Athens, K.A. Papakonstantinou, C.T. Kiranoudis and N.C. Markatos

24 (2000) 477

Thermal network

A note on the solution to a common thermal network problem encountered in heat-transfer analysis of spacecraft, M. Milman and W. Petrick

24 (2000) 861

Thermohaline convection

Penetrative convection in a horizontal layer of seawater near its freezing point, L. Hadji and M.A.R. Sharif

24 (2000) 733

Three-dimensional model

- Resolution by Galerkin method with a special basis of a geophysical flow in open sea: a Calvi's bay simulation, F. Bosseur, B. Di Martino and P. Orenge

24 (2000) 73

Time-varying demand

- An economic lot-size model for deteriorating items with lot-size dependent replenishment cost and time-varying demand, Y.W. Zhou and H.S. Lau

24 (2000) 761

Tracking degree

- Modeling microgeometric structures of porous media with a predominant axis for predicting diffusive flow in capillaries, X. Zeng, C. Vasseur and F. Fayala

24 (2000) 969

Truncated probability distribution

- Modelling of optimal specification regions, M.D. Phillips and B.R. Cho

24 (2000) 327

Turbulence

- A simple computational model for bubble plumes, R.S. Bernard, R.S. Maier and H.T. Falvey
Modelling of stretched natural gas diffusion flames, H.H. Liakos, M.A. Founti and N.C. Markatos

24 (2000) 215

24 (2000) 419

Turbulence model

- Computation of the turbulent plane plume using the $k-\epsilon-\overline{f^2}-\gamma$ model, K. Kalita, A. Dewan and A.K. Dass

24 (2000) 815

Turbulent buoyant convection

- Computational analysis of thermal comfort: the case of the archaeological museum of Athens, K.A. Papakonstantinou, C.T. Kiranoudis and N.C. Markatos

24 (2000) 477

Turning simulation

- Prediction of diameter errors in bar turning: a computationally effective model, J.R.R. Mayer, A.-V. Phan and G. Cloutier

24 (2000) 943

Two-dimensional unsteady flows

- Numerical solution of the two-dimensional unsteady dam break, C. Zoppou and S. Roberts

24 (2000) 457

Two-phase flow model

- A computer code for simulating hyper-concentrated sediment motions in steady and unsteady flows, K. Zhang and P. Dong

24 (2000) 495

Universal motors

- Magnetic saturation and steady-state analysis of electrical motors, F.M. Atay

24 (2000) 827

Unstructured grid

- Analysis of three-dimensional flow in a cylindrical sediment oxygen demand chamber, J.H.W. Lee, C.P. Kuang and K.S. Yung

24 (2000) 263

Upwelling

- A high-performance explicit vertical advection scheme for ocean models: how PPM can beat the CFL condition, I.D. James

24 (2000) 1

Van der Pol equation

- Asymptotic solutions for mode II dynamic rupture with nonlinear damping, Fan Jiashen and Fan Lei

24 (2000) 407

Variable replenishment cost

- An economic lot-size model for deteriorating items with lot-size dependent replenishment cost and time-varying demand, Y.W. Zhou and H.S. Lau

24 (2000) 761

Vehicle routing

- Current modeling practices in bank courier scheduling, C.J. Malmborg

24 (2000) 315

Vertical surface

- An inverse problem approach for estimating the wall heat flux in filmwise condensation on a vertical surface with variable heat flux and body force convection, P.-T. Hsu, S.-G. Wang and T.-Y. Li

24 (2000) 235

Vertical-mixing

- Modelling a bottom diurnal boundary layer and its control of massive alga blooms in an estuary, C.J. Hearn and B.J. Robson 24 (2000) 843

Warehousing

- An integrated performance model for order-picking systems with randomized storage, C.J. Malmborg and K. Al-Tassan 24 (2000) 95

Water column

- A high-performance explicit vertical advection scheme for ocean models: how PPM can beat the CFL condition, I.D. James 24 (2000) 1

Water quality

- Analysis of three-dimensional flow in a cylindrical sediment oxygen demand chamber, J.H.W. Lee, C.P. Kuang and K.S. Yung 24 (2000) 263

Wave number

- A simple soilstructure interaction model, S. Kocak and Y. Mengi 24 (2000) 607
